Govt. Of Kerala

Coordinator: Prof. Ratheesh T K  
Co-coordinator : Dr. Lakshmi J Mohan

Organized by  
**DEPARTMENT OF INFORMATION TECHNOLOGY**

## ABOUT GEC IDUKKI

The Government Engineering College, Idukki (GECI), was established in the year 2000 under the Directorate of Technical Education Government of Kerala. The college is currently affiliated to APJ Abdul Kalam Technological University and is approved by the AICTE, New Delhi. The college offers five UG programmes and four PG programmes in Engineering.

The scenic 25-acre campus is located at Kuyilimala, Painavu, the headquarters of the Idukki district. The campus is situated near state highway, SH-55 from Thodupuzha to Kattapana. The cool and picturesque environs of the Idukki wildlife sanctuary located in close proximity to the campus is ideal for the pursuit of higher education. The Idukki Dam is just 7 km from the campus. The temperatures are highest in May at around 25°C and December has the lowest average temperature of around 20°C.

## ABOUT DEPARTMENT

Department of Information Technology Government Engineering College Idukki was established in the academic year 2000. Highly committed & qualified faculty members are engaging the academic activities and are keen on encouraging students to involve in various co-curricular and extra-curricular activities. The department has highly advanced infrastructure including high speed internet facilities, class rooms equipped with LCD projectors and digital podiums.

The department labs are equipped with state of the art learning tools, advanced computing infrastructure with world class software environment and development tools which satisfy the bench mark in high end IT education. The Department also conducts short-term training program for both the staff and students for updating them with the latest technological trends.

## ABOUT THE COURSE

Linux is an operating system which allow application software to interact with the computer, understand the commands of application software and gets the job done. System administration of Linux is all about keeping a Linux-based computer in usable order. The six days course is designed to provide participants with the necessary skills and abilities to work as a professional Linux system administrator. The participants should have basic knowledge of Linux and its most common utilities and text editors.

The major topics covered are:

- Local & Remote login
- File System and Navigation
- File permissions
- Process management
- Updating software packages
- Creating & mounting file system
- Service management & Boot troubleshooting
- Network configuration
- Scheduled processes
- Firewall configuration
- Virtualization
